Preface by Prue Acton	14
Foreword by Gordon Undy	16
Introduction	17
Section I The nature of colour	
Chapter 1	
What is colour?	18
First steps toward understanding colour	21
Primary colours - light and pigment	28 - 29
Why does cyan and yellow make green?	33
Chapter 2	
Our colour vision system	34 - 40
Chapter 3	
Hue	41
How does our vision system create the secondary colours	42
How do we create cyan and magenta?	43
Chapter 4	
Purity and tone	46
Chroma? Purity? or saturation?	49
Chroma path	50
Further definition of purity	53
Tone	54 - 57
Tone keys	59 - 60
Summary Chapters 1 - 4	62 - 63
Chapter 5	
Colour wheel - logic of	64
Tone value cylinder	65
Colour cylinder	66, 71 to 73
Colour wheel – reference colour wheel	68 - 69
Colour wheel mid tone	70
Purity and tone sheets	72 - 73
Chapter 6	
Pigment	76
Ancient paint	78

Making good decisions - pigment, medium, surface	81 - 85
Opacity and (relative) Transparency	89 - 94
Undertones and top tones	94
Permanence of pigments (relative)	95 - 96

Section 2 Colour mixing

Chapter 7

Thinking in light mixing colours in pigment	99
Three colour palette	100
Six colour palette	104
Making your own rainbow plus magenta	106
Making beautiful greys with no black or grey pigment	108
Fundamental principle of colour mixing	110 - 112

Chapter 8

Three section colour wheel	113 - 118
Opposite colours make grey (or black)	119
Importance of oppositeness	120
To grey a colour add the opposite colour	121
How to find the opposite colour	122
Colour identification beyond name	123
Moving freely about the colour wheel	126
The colour cylinder and its relevance	127
Toward an understanding of colour mixing	128

Chapter 9

Getting the colour you want	129 - 130
To grey a colour by using the opposite colour	131
Curves between colours of differing purity	133
The curve of the connecting path	136
Different paths to the same colour	137
Many paths to a colour	138 - 139

Chapter 10

Colour mixing exercise 1	141
Using a natural subject - exercise	142 - 145
Colour mixing - exercise 2	146
Colour mixing - exercise 3	149
Dominant colour	150 - 153

Chapter 11

Working with light (RGB)	154 - 158
--------------------------	-----------

Colour as light - control of tone and purity	159
The HSB system	160 - 161
Chapter 12	
Simultaneous contrast	164
The eyes have it	165
Chevreul discovers the laws of simultaneous contrast	166 - 167
Principles of simultaneous contrast	169
Periphery colour = linkage	170
What pulls when you mix it pushes when you juxtapose it	172 - 173
Dominant colour = yellow	174 - 179
Chapter 13	
Chevreul's dilemma	182
The colour of mud or the flesh of Venus	184
The complement	189
Two ways of resolving the problem of yellow & green	191
Chapter 14	
Optical blending	192 - 193, 196 - 198
The colour of the created light	194 - 195
Neighbouring colour shifts	201 - 204
Chapter 15	
A golden beacon	205
Colour analysis of Wattle	207
Position instability	211
Colour dynamics	215 - 217
Chapter 16	
Colour and emotion	219 - 229
Colour supporting imagination	228
Twelve unique hues	230
Warm and cool colours – compare to colour temperature	232 - 233
Section 3 Interval and linkage	235
Chapter 17	
The experience of colour	236 - 238
Light = the total of all colour that is visible	239
What do you mean by beauty?	241
Personal choice exercises	244

Chapter 18

The colours within and without	245
How do we assess colour relationships	250
Interval – the only way of measuring	251

Chapter 19

Interval and linkage	252
Spatial interval	254
Diagrammatic definition of interval	256
Linkage	257

Chapter 20

Interval: tone, hue and purity	259
Hue and purity interval	261
Total interval in colour	262 - 263
Purity interval	265 - 266

Chapter 21

Interval pattern	269
Same intervals – different tones	270
Same intervals – different hues	272
What a beautiful coat you have	275
Interval patterns based on a King parrot	276 - 277
The search for resonance between colours	279 - 282
Interval relationship - dusk or sunset	289 - 290

Chapter 22

Learning from the colour intervals found in nature	293 - 295
Interval studies of various plants	296 - 303

Chapter 23

Shifting intervals about the cylinder without changing the pattern	304 - 308
Excuse me, but how do I do it?	312
Using the HTP Colour Guide to learn from nature, rather than immitate	315 - 316
Is a discordant colour combination the only way to attract attention?	318
A perfect and absolutely green leaf	323
Now then, why does all this affect the artist?	329
Selective Vision	333
Our vision of light is circular	334
Index	337
Acknowledgements	344
Reference Colour Wheel and HTP Colour Guide
